Description:

This book provides a framework for assessing Chinas extensive cyber espionage efforts and multi-decade modernization of its military, not only

identifying the what but also addressing the why behind China's focus on establishing information dominance as a key component of its military efforts. • Provides a detailed overview and thorough analysis of Chinese cyber activities • Makes extensive use of Chinese-language materials, much of which has not been utilized in the existing Western literature on the subject • Enables a better understanding of Chinese computer espionage by placing it in the context of broader Chinese information warfare activities • Analyzes Chinese military modernization efforts, providing a context for the ongoing expansion in China's military spending and reorganization • Offers readers policy-relevant insight into Chinese military thinking while maintaining academic-level rigor in analysis and source selection
